DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-21 and 34-41, drawn to a varactor tuning, classified in class 257, subclass 314, 288.

II. Claims 22-33, drawn to a wireless communication device having a varactor tuning, classified in class 455, subclass 208, 205.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination (group I) does not require an antenna to send and receive wireless signal in a wireless communication device. The subcombination (group II) has separate utility such as the subcombination has separate utility by using the antenna to transmit and receive wireless signal to adjust frequency such as cellular phones, Wireless Local Area Network (WLAN), etc. that merely controls the frequency in L-C circuit.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
